Total Marks : 50

Section - A

- 1) In $\triangle ABC$, $DE \parallel BC$, find the value of x . 1
- 2) In the given figure, if $\angle A = 90^\circ$, $\angle B = 90^\circ$, $OB = 4.5$ cm, $OA = 6$ cm and $AP = 4$ cm, then find the QB. 1
- 3) In $\triangle ABC$, if X and Y are points on AB and AC respectively such that $\frac{AX}{XB} = \frac{3}{4}$, $AY = 5$ and $YC = 9$, then state whether XY and BC parallel or not. 1
- 4) In the figure of $\triangle ABC$, the points D and E are on the sides CA , CB respectively such that $DE \parallel AB$, $AD = 2x$, $DC = x + 3$, $BE = 2x - 1$ and $CE = x$, then find the value of x . 1
- 5) Are two triangles with equal corresponding sides always similar?
Two triangles having corresponding sides equal are similar. 1
- 6) If ratio of corresponding sides of two similar triangles is $5 : 6$, then find ratio of their areas. 1
- 7) In given figure $DE \parallel BC$. If $AD = 3$ cm, $DB = 4$ cm and $AE = 6$ cm, then find EC . 1
- 8) In the given figure, if $DE \parallel BC$, then calculate x . 1
- 9) In the figure, PQ is parallel to MN . If $\frac{K}{PM} = \frac{4}{13}$ and $KN = 20.4$ cm, then find KQ . 1
- 10) If triangle ABC is similar to triangle DEF such that $2AB = DE$ and $BC = 8$ cm, then find EF . 1

Section - B

- 11) An equilateral triangle is inscribed in a circle of radius 6 cm. Find its side. 2
- 12) In the given figure, PS , SQ , PT and TR are 4 cm, 1 cm, 6 cm and 1.5 cm respectively. 2

Prove that $ST \parallel QR$. Also, find $\frac{\text{ar}(\triangle PST)}{\text{ar}(\text{trapezium } QRTS)}$

- 13) The sides AB and AC and the perimeter P_1 of $\triangle ABC$ are respectively three times the corresponding sides DE and DF and the perimeter P_2 of $\triangle DEF$. Are the two triangles similar? If yes, find $\frac{\text{ar}(\triangle ABC)}{\text{ar}(\triangle DEF)}$ 2
- 14) In the given figure, $CB \parallel QR$ and $CA \parallel PR$. If $AQ = 12$ cm, $AR = 20$ cm, $PB = CQ = 15$ cm, calculate PC and BR . 2
- 15) In given figure, D is a point on AC such that $AD = 2CD$, also $DE \parallel AB$. 2
Find: $\frac{\text{ar}(\triangle ACF)}{\text{ar}(\triangle BCE)}$

- 16) In a trapezium ABCD, diagonals AC and BD intersect at O. If $AB = 3CD$, then find ratio of areas of triangles COD and AOB. 2
- 17) $\triangle ABC$ is right angled at C. If p is the length of the perpendicular from C to AB and a, b, c are the lengths of the sides opposite $\angle A$, $\angle B$ and $\angle C$ respectively, then prove that $\frac{1}{p^2} = \frac{1}{a^2} + \frac{1}{b^2}$. 2
- 18) In the given figure, $\frac{PS}{SQ} = \frac{PT}{TR}$ and $\angle PST = \angle PRQ$. Prove that PQR is an isosceles triangle. 2
- 19) In the given figure, if $AD \perp BC$, prove that $AB^2 + CD^2 = BD^2 + AC^2$. 2
- 20) If A be the area of a right triangle and b be one of the sides containing the right angle, prove that the length of the altitude on the hypotenuse is $\frac{2Ab}{\sqrt{b^4 + 4A^2}}$. 2

Section - C

- 21) P and Q are the points on sides AB and AC, respectively of $\triangle ABC$. If $AP = 3$ cm, $PB = 6$ cm, $AQ = 5$ cm and $QC = 10$ cm, show that $BC = 3PQ$. 5
- 22) Shweta prepared two posters on National Integration for decoration on Independence day on triangular sheets (say ABC and DEF). The sides AB and AC and the perimeter P_1 of $\triangle ABC$ are respectively four times the corresponding sides DE and DF and the perimeter P_2 of $\triangle DEF$. Are the two triangular sheets similar? If yes, find $\frac{ar(\triangle ABC)}{ar(\triangle DEF)}$. What values can be indicated through celebration of national festivals? 5
- 23) In the figure, $\angle BED = \angle BDE$ and E is the middle point of BC. Prove that $\frac{AF}{CF} = \frac{AD}{BE}$. 5
- 24) Prove that in a right triangle, the square of the hypotenuse is equal to sum of squares of other two sides. 5
Using the above result, prove that, in rhombus ABCD, $4AB^2 = AC^2 + BD^2$.
